

## General requirements for the articles and information about the author

The name of the file with information about the author ( <b>application for publication</b> )	<b>Separate file</b> with the name «Application - name of the author»
The name of the file that contains <b>the article</b>	<b>Separate file</b> with the name «Title of article section - name of the author»
Type of files	Microsoft Word 2003-2007 (doc)
Sheet size	A4
Fields	top and bottom - 2.5 cm, left - 3 cm, right - 1.5 cm
Text alignment	by width
Paragraph (indent)	1,25 cm
Language	English
The uniqueness of article	Article should not occur in other printed media.

### Application for publication

Surname, Name of author Surname, Name co-authors	
Title of article	
Department, university	
City, country	
Contact phone number and e-mail address	
Surname, Name of scientific supervisor, Place of work, scientific degree	

**The following files should be sent as an archive RAR: «Application - name of the author", "Title of article section - name of the author", "Review"**

## Important Considerations

1. Patient information must be 'de-identified'
2. Necessary approvals and consents should have been obtained
3. Potential competing interests should be disclosed.

## Making a title

The words "case report" should be in the title. Key elements of the case should be mentioned in the title and might include the presenting symptoms, the diagnosis, intervention, or outcome.

Title of article	Font -Times New Roman 20, bold ; Text Alignment - Central
The authors, co-authors	Font - Arial 10 ; Text Alignment - Central. Name, Surname, department, university, city, country, email (in the sequence)

## Abstract formalization

In about 200 words summarize the:

1. Rationale for this case report;
2. Presenting concerns of the patient;
3. Diagnoses;
4. Interventions (including prevention and lifestyle);
5. Outcomes;
6. Main lessons learned from this case.

The abstract should be after the title and before the article, consists of 3 short paragraphs:

- Background
- Case
- Conclusion

Font	For headlines of paragraphs - Times New Roman 10, uppercase, bold;  For a summary of text - Times New Roman 10.
Colour	For headlines of paragraphs - blue;  For a summary of text - auto
Word limit	200
Line spacing	1,0

## Keywords

Provide 2 to 5 key words that will assist in an online search for this case report.

## Article formalization

The headlines of paragraphs	<b>Introduction;</b> <b>Case history;</b> <b>Intervention;</b> <b>Outcome;</b> <b>Discussion;</b> <b>References (up to 20-30).</b>
Font	For headlines of paragraphs - Times New Roman 12, uppercase, bold; For a summary of text - Times New Roman 12.
Colour	Auto
Word limit	4000
Line spacing	1,0
Tables, schemes, diagrams, illustrations	Coloured, black and white; Embedded in the text, signed The maximum number - 6.
Formulas	Must be created in the embedded equation editor of Word.
Making a list of references	Reference is placed at the end of the article, numbered

### Introduction.

Briefly summarize the background and context of this case report.

### Case history:

**Presenting Concerns.** Summarize the patient's presenting concerns along with key historical data and demographic information.

**Clinical Findings.** Summarize the:

1. Medical, family, and psychosocial history (including lifestyle and genetic information);
2. Pertinent co-morbidities and interventions;
3. Physical examination focused on the important findings including diagnostic testing.

**Diagnostic Focus and Assessment.** Summarize the:

1. Diagnostic results (testing, imaging, questionnaires, referrals);
2. Diagnostic challenges;
3. Diagnostic reasoning;
4. Relevant prognostic characteristics (such as staging).

**Intervention:**

Summarize recommendations and interventions (pharmacologic, surgical, lifestyle) and how they were administered (dosage, strength, etc.)

**Outcome.**

Summarize the clinical course of this case. How was patient adherence to the intervention assessed and were adverse events noted? Summarize patient-reported outcomes and follow-up diagnostic testing.

**Discussion.**

Summarize the strengths and limitations associated with this case report. Include references to the scientific and medical literature. How did you arrive at your conclusions and how might these results apply to other patients? What are the "take-away" messages?

**Patient Perspective.** When appropriate, the patient should share their experience of their care in a brief narrative published with (or accompanying) this case report.

**Informed Consent.** The patient should provide informed consent for this case report.

# Provision of No-Cost, Long-Acting Contraception and Teenage Pregnancy
